3 Methods To Determine Finger Size

The Finger Method Test

- Find one of your loved ones rings that she wears and that fits snug.
- Put it on your finger and make a mark with a pen.
- Make a note of the thickness of the ring you used.
- *TIP: If she normally wears the measured ring on a dominant right hand, the left ring finger should measure 1 size smaller.*

The Dog Collar Method

- Print and carefully cut out our paper ring sizer below.
- Cut along the dotted line marked "Find your size" to make a slit.
- Slip the pointed end through the slit and place around your loved ones finger.
- Pull the pointed end so it slides to a snug fit.
- The arrow will point to your ring size.
- Aim for a comfortable, snug fit.
- *Tip: For the most accuracy, have someone help you measure.*

The Secret Method

- Print our chart of ring size circles.
- Find a ring that your loved one currently wears.
- Place the ring on top of each circle until you find a perfect match.
- The match should perfectly fit in the inside on the ring.
